

## APPENDIX PP

### CONSOLIDATION AND CONTAINERIZATION POINT (CCP) CENTER CODES (CONSOLIDATED CONTAINERIZATION POINT)

Number of Characters:	Three
Type of Characters:	Numeric
Data Location	
Military Standard Requisition and Issue Procedures (MILSTRIP) Shipment Status Card:	rp 78-80
Responsible Agency:	Defense Transportation Regulation (DTR) Administrator

#### A. GENERAL

1. The CCP codes identify activities that have been established by the Services and the Defense Logistics Agency to consolidate cargo for onward movement overseas or within the Continental United States (CONUS).
2. The CCP codes are used for overseas shipments. These codes are structured like the CONUS water port identifier codes and are used on MILSTRIP documents to indicate the shipment routing. The first position of the three-position code represents the geographic area in which the CCP is located. The second and third positions identify the specific CCP within the geographic area. Activities tracing shipments routed through a CCP cite the code in the Port of Embarkation field and send the tracer to the Military Surface Deployment and Distribution Command Operations Center. The most current versions of the codes are available at the Table Management Distribution System website at: <https://TMDS03.scott.af.mil/>.
